About the Council of Accountable Physician Practices (CAPP)

The Council of Accountable Physician Practices (CAPP), an affiliate of the AMGA Foundation, is a coalition of visionary medical group and health system leaders. We believe that physicians working together, backed by integrated services, systems, data and technology, can best shape and guide the way care is delivered so that the welfare of the patient is always the primary focus.

OUR VISION

Integrated or organized systems of care will drive movement toward providing superior health care for patients, combining high quality and service with affordability.

OUR MISSION

CAPP promotes the superior performance of our physician-led medical groups and health systems in providing patient-centered medical care that maximizes the quality and duration of life and enhances the health of our patients and entire communities.

OUR CORE CHARACTERISTICS

Integrated (or Coordinated) Care: When physicians work in collaboration and coordination with each other and with other healthcare providers, such as hospitals, specialists, and skilled nursing facilities, they can provide superior quality health care to their patients and communities.

Outcomes-based Payment: When physicians are paid based on how they improve health and not on the volume of services they provide patients, they are incentivized to improve and maintain their patients health through more effective prevention, diagnosis, and rapid intervention.

Health Information Technology: When physicians use 21st century technology to augment their clinical skills, communicate with one another, and access patient health information at each point of contact, patients receive better, safer medical care and treatments based on proof.

Physician Leadership: CAPP groups and health systems are physician-led, therefore we keep the needs of both doctors and patients top of mind. When physicians provide strong leadership in the healthcare delivery system by taking accountability for quality and service, patients benefit.

Quality Improvement: Through our ability to continually measure and monitor how we improve the health and lives of our patients, CAPP groups can demonstrate our value to our patients and our communities.

CAPP Member Groups

Advocate Physician Partners
Rolling Meadows, IL

Atrius Health
Newton, MA

Austin Regional Clinic
Austin, TX

Billings Clinic
Billings, MT

Cleveland Clinic
Cleveland, OH

**Colorado Permanente
Medical Group**
Denver, CO

Confluence Health
Wenatchee, WA

Davita HealthCare Partners
Torrance, CA

Dean Health System
Madison, WI

Essentia Health
Duluth, MN

Everett Clinic
Everett, WA

Geisinger Health System
Danville, PA

**Hawaii Permanente
Medical Group**
Honolulu, HI

**HealthPartners
Medical Group**
Bloomington, MN

Henry Ford Health System
Detroit, MI

Intermountain Healthcare
Salt Lake City, UT

The Jackson Clinic
Jackson, TN

**The Lahey Clinic
Medical Center**
Burlington, MA

Marshfield Clinic
Marshville, WI

**Mayo Clinic/Mayo
Health System**
Rochester, MN

**Mid-Atlantic Permanente
Medical Group**
Rockville, MD

Northwell Health
Islip, NY

**Northwest Permanente,
Physicians and Surgeons**
Portland, OR

Ochsner Clinic
New Orleans, LA

Palo Alto Medical Foundation
Palo Alto, CA

**The Permanente
Medical Group**
Oakland, CA

Reliant Medical Group
Worcester, MA

**Sharp Rees-Stealy
Medical Group**
San Diego, CA

**The Southeast Permanente
Medical Group**
Atlanta, GA

**Southern California
Permanente Medical Group**
Pasadena, CA

**Virginia Mason
Health System**
Seattle, WA

**Washington Permanente
Medical Group**
Seattle, WA

AHCJ CONFERENCE 2018

CAPP's Physician Leader Experts are Available to Comment on These and Many Other Topics

FIXING HEALTHCARE

The real hope for healthcare reform lies in the changes that are taking place within the delivery system, led by physicians and multi-specialty medical groups who have pioneered innovation for decades. What are these innovations and how can they be made available to all Americans?

CLOSING THE GAPS IN CANCER CARE

While advances in cancer therapies are helping to improve survivorship for millions of cancer patients, huge disparities exist between geographies, demographic and ethnic groups. Gaps in coordinated care and communication negatively impact patient outcomes. [CAPP and the American Cancer Society](#) partnered to identify solutions that are achievable on the national and local levels.

ACHIEVING CONSISTENT QUALITY MEASURES FOR HEALTH CARE

There's no shortage of metrics in health care – but what do they mean? CAPP's primer, "[Moving the Needle on Meaningful Health Care Quality Measurement.](#)" recommends a way to have accurate and meaningful metrics that are true indicators of quality health care.

THE ROADMAP FOR HEALTH CARE TECHNOLOGY

The electronic medical record was an an important first step in connecting our fragmented health care system. What is needed now is the capability to link all members of the health care team to real-time clinical information for every patient. CAPP's primer, "[Moving the Needle on Interoperable Health Care Technology.](#)" provides recommendations to move forward on improving the coordinated use of health information technology, focusing specifically on interoperability.

BENDING THE HEALTHCARE COST CURVE

Healthcare has passed the affordability threshold for millions of Americans. What needs to be done to rein in the cost curve and improve the quality of care?

MORE MONEY FOR WORSE HEALTH

The U.S. continues to spend more on healthcare than other Western nations, but patient care results continue to deteriorate toward “third world” status. Why? What should be done about this persistent and disturbing trend?

TRUE PREVENTION

Everyone believes in the value of prevention to maintain good health, yet CAPP national surveys reveal that patients aren't getting the prevention message from their doctors. Why is it so hard to put prevention into practice in our healthcare system? And what solutions exist that will make preventive measures available and applied by all Americans, saving lives and avoiding unnecessary healthcare expenses?

PATIENTS AND PAY-FOR-VALUE

The movement towards pay-for-value is one of the most transformative changes in healthcare since Medicare. How will outcomes-based payment influence the type of healthcare that is delivered in America? What changes are patients likely to experience?

PATIENT EXPECTATIONS AND THE ACCOUNTABILITY GAP

How are we doing in delivering accountable care? Integrated multi-specialty medical groups are meeting the needs and expectations of patients. But according to CAPP national surveys, there's considerable room for improvement.

THE DIGITAL DIVIDE BETWEEN DOCTORS AND PATIENTS

How Americans do – and don't – use digital technology to connect with their physicians has been revealed in CAPP surveys. What must be done to close this gap? And what does the gap cost us in terms of poor outcomes, lack of access, and excess costs for healthcare?

POPULATION HEALTH

What approaches to population health management are working? What are best practices? CAPP member groups are leaders in leveraging technology, data analysis, prevention, and care coordination to move the needle on population health. Find out how they approach this mandate and how they achieve success.

PHYSICIAN LEADERSHIP

True reform of the American care delivery system requires leadership by clinicians who keep the welfare of the patient first and foremost and who can collaborate with their peers to influence change. CAPP physicians can share published results from their successful leadership development programs to identify, recruit, train and retain clinical leaders in a variety of healthcare settings.
